

Detox While You Relax

Anline™

Ion Detox Foot Spa

Detoxification Was Never So
Simple...
Easy...
And
Safe!!!

Color Chart

During the course of your ion Spa or foot spa session, the unit's water will most likely change color and bits of foreign matter may appear as sediment (toxins being removed with the foot bath). This is to be expected. The water color change in the foot spa is caused by a reaction between the toxins being pulled from a user's body and particles in the water, salt added to the water, the metals in the ionizer and the acidity or alkalinity of the user. Please note that the color produced by the aforementioned reactions will depend, to a certain extent, on the user's food & lifestyle, chemical impurities of the water in your geographic area and existing health condition.

The following color chart is based on what we believe to be represented by the water colors (the colors used in the chart below are not representative of the actual color of the water).

Color or Particle	Material or Area of the Body Being Detoxified	Possible Symptoms
Black	Accumulation of heavy metal	Diabetes, CVD, Liver
Brown	Liver, Tobacco, Cellular Debris	Smoking, obesity, cholesterol, fatty build up
Dark Green	Gall Bladder, digestive system	Weak Immune system
Orange	Joints	Arthritis, Rheumatism, Gout etc
Red Flecks	Blood Clot Material	Thrombus, Hypertension, Cold hand & feet
White Cheese-Like Particles	Most Likely Yeast	Constipation, insomnia and dreamful sleep, flatulence, hemi-crania
White Foam	Mucous from Lymph System	Skin allergy, irregular menstruation
Yellow-Green	Kidney, Bladder, Urinary Tract, Female/Prostate Area	Gynecological diseases, proctitis, UTI

Enjoy Disease Free Longer & Healthier Life

Dear Valued Customer,

It is our great pleasure to present you **Anline™ Ion Detox Foot Spa: The Most Advanced Ionic Cleanse unit.**

This unit is a revolutionary discovery of scientific advancement in complementary & alternative health care. Thousands of people are benefiting from **Anline™ Ion Detox Foot Spa everyday.**

As a natural health care practitioner, products/service provider: Spa, Clinic, Gymnasium or a simple user, **Anline™ Ion Detox Foot Spa** will greatly help you to achieve optimum health and quality of life. Users have noticed significant improvement in their health conditions, such as High Blood Pressure, Diabetes and Pain & Inflammation etc. For a healthy person, it helps to main optimum health and quality of life.

We strongly advise you to read the user's manual thoroughly before start using this unit. It is very important to use it properly. Improper use will simply damage the unit and will not be covered by warranty.

Please do not hesitate to contact us for any further information you need.

Best wishes in good health.

Dr. A. Lee

www.osmfan.com

Why Detox:

Our body accumulates different types of toxins everyday through eating, drinking, breathing and some other process such as drugs, chemicals and exposures to toxic environment etc. These toxins cause cell of the body to die faster, causing pre-mature aging and diseases. Our body has organs and systems to detoxify it. But over the years, load of toxins, improper diet and lifestyle, the excretory organs of our body fails to function at its best, leaving us lethargic, weak immune system, and caught by diseases leading to early and painful death.

Through proper detoxification, we can significantly reduce the load of toxins, prevent diseases, slow down the aging process and Enjoy a Disease Free Longer and Healthier Life. Amongst all of detoxification methods in practice, Ion Detox Foot Spa is probably the best method.

Ion Detox Foot Spa

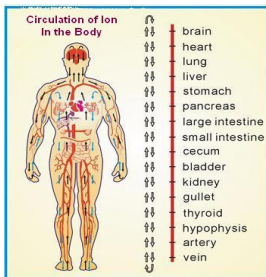

Anline™ Ion Detox Foot Spa is a state of the art, digital, computerized ionic foot-bath. These naturally stimulating and relaxing sessions are based on ionization of water and osmosis of energy ions to draw toxins from the body. These services have been known to:

- ⇒ Enhance body detoxification
- ⇒ Regulates Blood Sugar and Blood Pressure
- ⇒ Inactivate viruses, bacteria, yeast and fungus
- ⇒ Reduce pain and inflammation
- ⇒ Purify the blood and lymph
- ⇒ Stimulate the immune system
- ⇒ Promote weight loss
- ⇒ Relieve tension and more....

Because of poor diet and high stress, we tend to accumulate and store excessive quantities of waste products. The Ion Cleanse creates a similar environment as a walk along a beach, only more powerful, because your feet are in direct contact with the ions being made in the

water. Neutralized particles are pulled out of the body through the skin via osmosis. Color changes in the water are some of the indicators that toxins are being removed from the body. The particles, fat and mucous residues found in the water after the bathing reflect wastes that have left the body during the 30 minute session. The Ion Cleanse footbath sessions will support any cleansing modality and may even reduce the discomfort associated with rapid detoxification. Repeated sessions improve the results.

How the Ion Detox Foot Spa Works?

An ion is a charged atom that has gained or lost an electron which creates a magnetic field capable of attaching to and neutralizing oppositely charged particles. These neutralized particles are extracted from the body through the process called osmosis. Osmosis is a scientific term that is used to describe the movement of particles

through a membrane from an area of lower concentration to an area of higher concentration. In this case, the higher concentration refers to the ion field that is set up by placing the array into the water while running the unit.

The array is placed into the water alongside the hands, feet, or body while the power supply delivers a low level direct current to the array. This causes the metals within the array in combination with water and salt to generate positively and negatively charged ions by separating oxygen and hydrogen in the water.

Principle: water is broken down into lots of energy ions (namely positive and negative ions). These active energy ions penetrate into human body via capillary bore and cell membrane and thus supply body with negative ions. After complex biochemical reaction the positive and negative ions

in body release high energy, increase the vigor of cells and promote the all kinds of enzyme (ferment). They also improve the metabolic function of each excretory organs of human body, expedite metabolism. In 30 minutes, toxin and wastes such as aged cells that accumulated in body will be expelled fast and safely and human body will recuperate gradually. The different color of toxin expelled from different part will make you know the health status of our own body.

Unlike most other Ion Cleanse Machines, **Anline™ Ion Detox Foot Spa** does not require the practitioner/attendant to determine the polarity setting as this unit is completely computerized. The unit automatically determines the polarity as per the pH of user's body. We speculate that ions generated by the Ion Detox Foot Spa travel through the body attaching themselves to a multitude of toxic substances, thereby neutralizing their positive or negative charge. It may be possible to reduce pain and other symptoms caused by a lifetime of toxic buildup in the body (assuming the symptoms are caused by toxic buildup). The long-term effectiveness of the Ion Cleanse detoxification process depends on other life-enhancing changes a person is willing to make.

The Meaning of Positive and Negative

For the purpose of Ion Cleanse discussions, positive and negative relate to electrical rather than chemical phenomena.

When the Ion Cleanse is set to positive, the current is directed to the positive pole, which results in the production of more negative ions in the water. Therefore, a positive polarity generates a negative ion flow which, we believe, raises blood pH from acidic toward alkaline. When

the Ion Cleanse is on negative, the current is directed to the negative pole, which results in the production of more positive ions in the water. Therefore, negative polarity generates a positive ion flow which, we believe, lowers blood pH from alkaline toward acidic.

Approximately 95% of people in this culture experience a state of acidity; that is, their bodies contain an excess of hydrogen ions, and their blood pH is lower than 7.45. These people will greatly benefit from exposure to high concentrations of negatively charged ions. However, we have found that most people prefer a mixture of positive and negative ions in each Ion Cleanse session.

Colors and Objects in the Water

Many colors and objects appear in the water during Ion Cleanse sessions. There is a reaction between the toxins and particles in the water, the salt added to the water, the metals in the array, and the acidity or alkalinity of the person being bathed. All of these combine to produce color, whether or not feet are in the water. The basic color produced by these reactions varies from one geographic area to another.

It is important to understand that the water will change color even if the unit is operating without feet in the water. The basic color change is a result of the reaction between all of the variables in the water and the array, as discussed above. This color change will vary in accordance with the toxic and chemical components of the water and air given a particular geographical area.

The toxins in our bodies will look the same as the toxins predominant in a specific area; however, there will be more toxic particles in the water with feet in it. You will also find that water-based toxins will not stick to the side of the bucket and array, whereas substances pulled from the body will form a sticky ring that must be removed with a detergent.

However, through many tests, we have found that the residue in the bucket is easily rinsed off if the unit operates without feet in the bucket. In addition, the residue produced while a person's feet are bathed has been found to stick to the bucket and cling to the array. The bucket will then require some type of scouring powder or soap in order to be thoroughly cleaned.

AnIne™ Ion Detox Foot Spa:

Negative Ion's effects on human body

I. Effects on nervous system: strengthen the function of cerebral cortex and the activity of brain, elevate nerve cells, increase working efficiency and improve sleep quality. Negative ion can also enhance the oxygenation process of brain tissue and make brain tissue gain more oxygen.

II. Effects on cardiovascular system: negative ion has obvious effect on relaxing blood vessel, suppressing cholesterol level in serum, purifying blood, preventing sediment of lipid on blood vessel walls, improving blood circulation, relieving arterial spasm, and stabilizing blood pressure; negative ion is very good for improvement of cardiac function and assimilation nutrients important to the heart, as well as the recovery of hypertension patients and patients of cerebro-vascular diseases.

III. Effects on blood system: As confirmed in researches, negative ion can prolong coagulation time, increase oxygen content in blood, and profit the feeding, absorbing and utilization of oxygen.

IV. Improve the activity of Natural Killer cells that can destroy cancer cells and suppress the generation and transition of cancer.

V. Reduce inflammation and have application in beauty treatment and skin treatment. For example: negative ion treatment can heal burnt skin rapidly. In addition, it can help with the treatment of herpes and psoriasis is still in research stage.

VI. Prevent arteriosclerosis and oxidation of lipids. High density of positive ion and free radical cause the oxidation of fat, while fast fat oxidation will make organism age rapidly.

VII. Cleanse waste of skin. improve activity of skin and have obvious effect on beauty treatment.

Water's function in human body

- a. Improve assimilation: what we eat in daily life must be chewed by teeth and get moist by sputum and arrive at intestines and stomach by gullet to get complete assimilation and absorbing which need water to help. The assimilation function can not be completed without adequate water.
 - b. Eliminate intestinal waste: the surplus waste after the food is digested and absorbed must be expelled from body by sweat, breath, stool and urine. Though the evacuation methods are different, the whole process goes smoothly with the help of water.
 - c. Lubricating arthritic joints: The activities of friction between bones are not flexible if the organs of human body have no lubricant liquid. Water is the source of lubricant liquid.
 - d. Improved skin tone: More water increase blood flow into the skin and moistens the connective tissues in the skin. The result is better skin tone and fewer wrinkles.
- f. Lymph and blood: Nutrition transportation, evacuating rubbish and recycled work depend on water to impel. The activities in human body and the metabolism of every organ need water to keep.

Organs of human body taking the task of detoxification?

- a. **Brain:** Brain is not a direct detoxifying organ, but the psychic factor obviously affects the functions of detoxifying organs, especially pressure and strain can restrict the operation of detoxifying system and decrease the effects of toxin expelled.
- b. **Eyes:** The tears flew out indeed include many deleterious substances that are not favorable to health according to the confirmation of medical experts.
- c. **Kidney:** Kidney is the most important detoxifying organ in human body. It not only filters the toxin in blood and expels these toxins from human body by elimination, but also takes on the function of keeping the balance of water, minerals and nutrients and maintains body fluid level during detoxifying process.
- d. **Stomach:** Main function of stomach is to kill pathogen in food and digest food, but sometimes have detoxification function.

e. Lymph system: Lymph system is the third set of recycling system in human body and acts as the role of toxin recycle bin. The flowing of lymph liquid in the whole body reclaims the toxin in human body to lymph. The toxin is filtered by lymph and sent to blood, lung, skin, liver, kidney and so on and then expel from body.

f. Lung: Lung is one of the easiest organs that accumulate toxin. People inhale 1000L air with much bacterial, virus, dust and other deleterious substances floating on it into lung every day. Lungs also expel partial deleterious substances by breath and exhaust gas by metabolism in human body.

g. Liver: Liver is the largest detoxification organ and converts substances that is useful to your body by special detoxification enzyme and then is absorbed, but some toxins in food remain.

The reason why feet is the second heart:

a. The sole of people have thousands of twig nerves and have close relations with cerebra, heart and other organs in human body, so people say that feet are the second heart of human being. Feet muscles may help heart to improve blood recycling.

b. The activities of feet may improve heart functions, because heart muscles belong to involuntary muscles that can not be controlled by individual volition, but the muscles of feet went by the name of the second heart may be controlled by individual volition which belong to voluntary muscles, so you may strengthen the activities of your feet in order to prevent caducity of human body and improve the function of heart

We have also found that a person's detoxification session will override the geographical toxicity of the water. Based on EAV (Electro Acupuncture by Voll) testing, the color table shows what we believe the colors in the water to represent:

Why **Anline™** is your better choice:

1. Fully computerized and automated digital control;
2. Fourth Generation model – no dials to set, monitor or knobs to adjust, maximum safety features;
3. Built with CIAS-Computerized Ion Adjustment System;
4. Easy-to-Use and convenient, anyone can use;
5. As the setup and operation is fully automated, **NO CHANCE OF HUMAN ERROR**;
6. Frees up practitioner to do other therapies at the same time
7. The ARRAY lasts for 50-70 session and **NO trouble of plate changing required**
8. **Very low replacement cost of ARRAY**
9. Password protected
10. Doctor Recommended
11. One Year Warranty

CE-Certificate of European quality safety system
 Approved by CQGC(China Light Industry Quality Guarantee Centre)
 Passed the Guangdong Commercial Chamber of High-Tech Estate.
 Tested by Centre of Technology Quality Intendance
 Testing Department of Guangdong Province
